

# AMOUR ELECTRIQUE

## Technical information

**Duration of show:** 30mn

**Dancer / musician:** Neige Scariot & Baptiste Dequet

**Duration of assembly:** 1h30 + 1 additional hour in case of lighting assembly, allow 1 hour minimum between the end of the assembly and the start of the performance.

For your information, we are traveling in a van with a volume of 6 m<sup>3</sup>.

**Minimum playing area:** 6m x 5m. Hard ground (concrete, wood, etc.), flat and of the required level.

**Décor:** one table (1.60m x 0.70m) and two chairs, a decorative element 2m x 1m

**Public performance:** 300 max

### Technical:

We are autonomous for a capacity of around 100/200 people.

In this case we need a 220V 16A input European connector.

(Our system consists of two Mackie Thump 15A speakers, an Electro Voice 12-inch sub and a Yamaha console manipulated live by the musician, the general signal can be sent to another system for greater gauge).

If night performance: we can provide our lighting otherwise provide projectors covering the playing surface.

Equipment requested (for information only): 4 projector stands, 4 500 W PCs, 1 4-channel dimmer with dedicated controller, 1 additional 16 A inlet.

A manager may be requested from the organizer for the lighting installation.
