IS THIS DESIRE

TECHNICAL SPECIFICATIONS

SELF-CONTAINED VERSION

Show duration: 40 minutes

Dancer: Neige Scariot

Capacity: 80–100 people

Performance space:

The required performance area is a flat, rigid, level floor with a width of 7 meters and a depth of 5 meters (ideal) or a minimum of 4 meters (in this configuration, we need a clearance of 1–1.5 meters behind the performance area to place the lanterns). A wood floor is required (dance floor, staging platforms, etc.).
For outdoor performances, leveled staging platforms are required; the height is to be determined based on the audience layout.
Tiered seating for the audience is preferable for visibility.
An intimate show requiring a darkened environment (total blackout is necessary).
We can adapt to various venues (libraries, community centers, museums, unconventional spaces, etc.) as well as performance times.
We can also create a "black box" setup if necessary to enhance the performance space.
Please provide a room near the performance area to serve as a dressing room.

Equipment provided by the company:

Set/Decor: a floor lamp, a chair, a small side table with a gramophone, and 5 lanterns on adjustable stands.
Technical: we provide all sound and lighting equipment necessary for the performance, as well as a black dance mat and (fire-retardant) masking curtains to create a "black box" if needed.

Sound system:

The company will set up two speakers on stands at the front and 2 stage monitors.
Plan to elevate the control booth on a riser if the audience is standing.

Lighting:

We are self-sufficient.
The entire setup runs on two 220V, 16A circuits.

Setup/Teardown time:

Installation requires 4-hour; allow an additional 2 hours to create a "black box" setting.
Teardown requires a 3-hour shift.
For reference, we travel in a van with a 6 m³ cargo capacity.

VERSION FOR FULLY EQUIPPED VENUE

Show duration: 40 minutes

Dancer: Neige Scariot

Capacity: 100–150 people

Performance space:

The required performance area is a flat, rigid, level floor with a width of 7 meters and a depth of 5 meters (ideal) or a minimum of 4 meters (in this configuration, we need a clearance of 1–1.5 meters behind the performance area to place the lanterns). A wood floor is required (dance floor, staging platforms, etc.).
For outdoor performances, leveled staging platforms are required; the height is to be determined based on the audience layout.
Tiered seating for the audience is preferable for visibility.
An intimate show requiring a darkened environment (total blackout is necessary).

Equipment provided by the company:

Set/Props: floor lamp, chair, small side table with a gramophone, 5 lanterns on adjustable stands.
Technical: We provide all sound and lighting equipment needed for the performance, as well as a black dance mat and (fire-retardant) side masking curtains to create a "black box" setting if required.

Sound system:

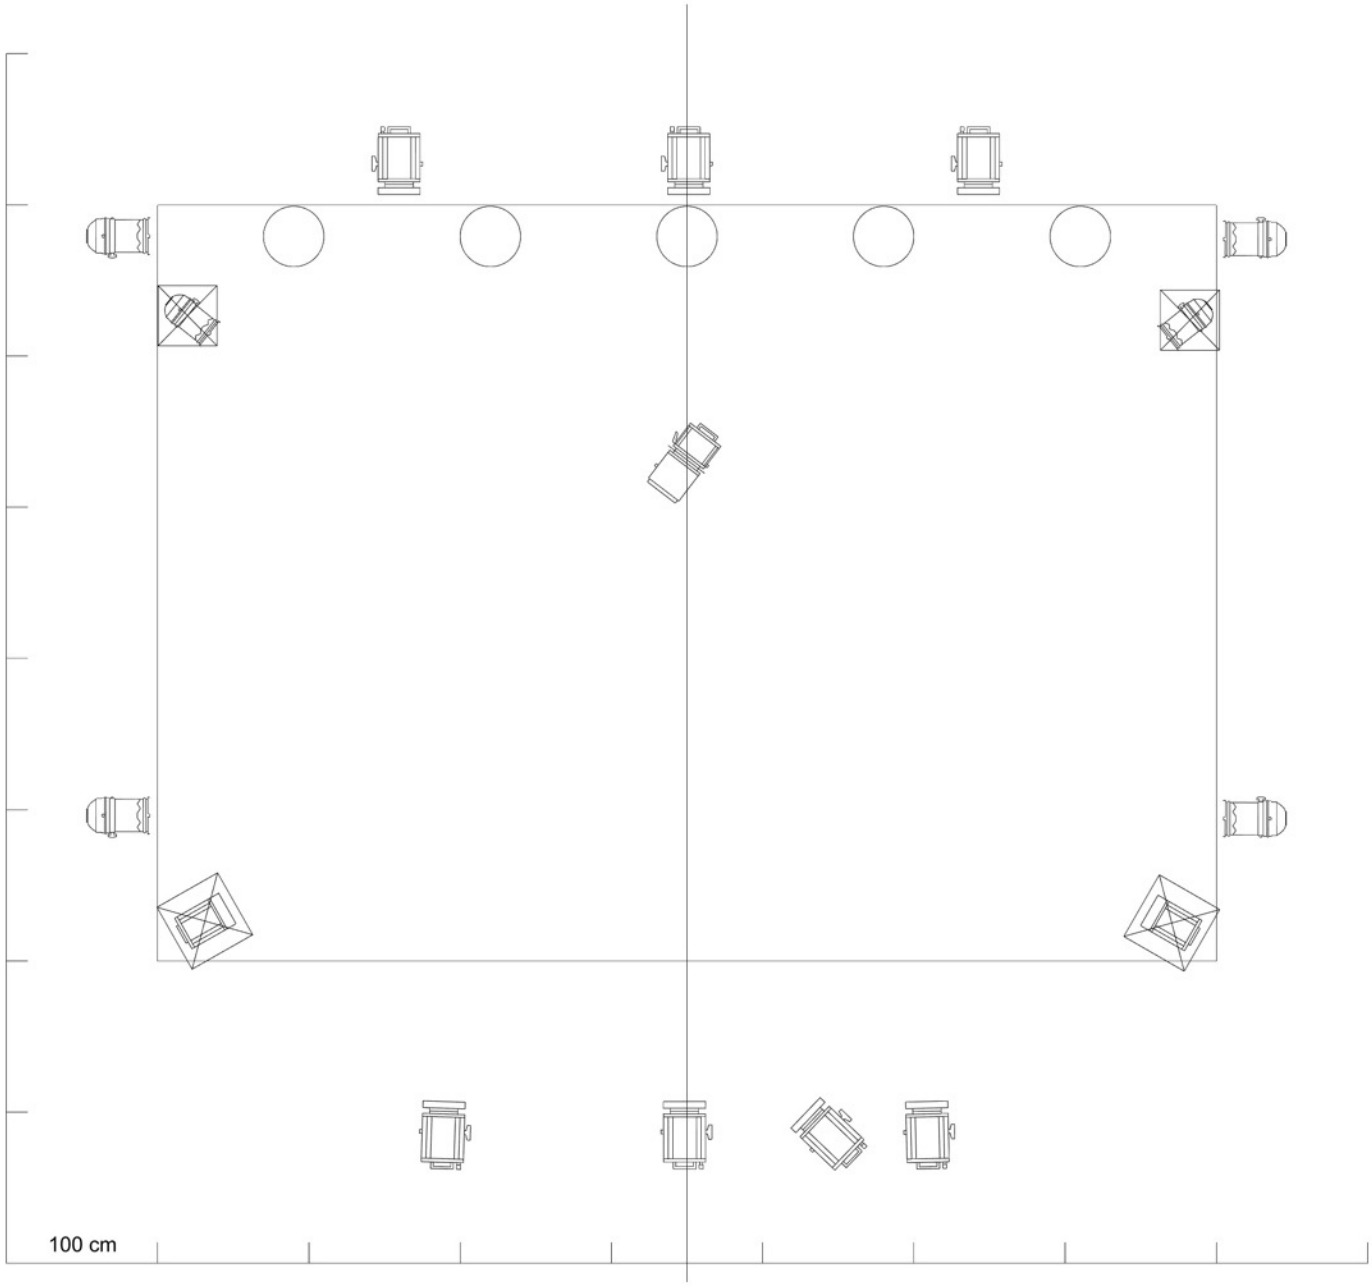

Sound system adapted to the venue, including 2 stage monitors on stands.

Lighting:

See lighting plot.
The 5 lanterns will be mounted on the same bar as the backlights.

Setup/Teardown time:

Pre-installation is required.
Installation and focusing require a 4-hour call.
Teardown requires a 2-hour call.
For reference, we travel in a 6m³ van.
